

# SE Hennepin Property Mitigation Status

(Includes GM & SA249)

---

- Sub-slab vapor sampling complete = **362**
- Mitigation eligible (169) or offered (31) = **200**
- Mitigation system (SSD) installed = **187**
- Properties refusing mitigation (eligible/offered) = **4**
- Properties refusing sampling access = **32**

# Groundwater Investigation Update

---

- Sub-slab sampling continues in areas NE, SW and south of mitigation area (see map)
  - MPCA/Bay West conducting some sub-slab sampling in these areas
- GM installed network of approximately 25 sentinel vapor ports (see map)
  - Sentinel vapor points to be sampled quarterly
  - No vapor point data as of 3/31/2015

# Loose Ends

---

- Obtain access for sampling
  - 32 remaining properties in the study area, SW, SE and NE locations
- Obtain access and complete mitigation on eligible and offered properties
- File an affidavit on properties where access cannot be obtained

# Communication & Outreach

---

- TCEducate series
  - Public Health Hero award
- SECIA Environmental Committee
  - Asked to give update at April 28 meeting
- Next steps on outreach TBD
